January 22, 2024 – Transfer Profile Organizer Role

2024 · https://www.primaryrecord.com/docs/january-22-2024-transfer-profile-organizer-role/

- General
  - An issue with flickering icons was resolved.
- Medical Profile
  - Organizers can now transfer the role to a user not listed as a collaborator on the profile. This makes it much quicker and easier to hand off the role to someone who is not yet a user of Primary Record.
  - The list of visits now contains upcoming and past visits in the default list view rather than splitting the visits by list filters. This makes it easier to find what people are looking for from past visits and quickly see upcoming visits.
