November 13, 2023 – Expanded Care Team functionality

2023 · https://www.primaryrecord.com/docs/november-13-2023-expanded-care-team-functionality/

- **General**
  - Increased the size of tough targets, like buttons and menu controls, for better usability
  - Added a clickable breadcrumb to support easier navigation in profile sections
  - Allow users to take a picture when they attach an image in addition to selecting an image from a gallery
  - Added better date input formatting
- **Homebase**
  - Removed the profile view activity for the signed-in user for profiles they are the organizer of from the activity feed because it was not helpful.
- **Notes**
  - Updated a typo in a description
- **Medical Profile**
  - Added related Care Team, Medications, and Conditions to Visits
  - Fixed a bug that made some profiles not clickable
  - Updated the Care Team list card to show the description of the Care Team member rather than just the address
  - Updated the start date on a condition rather than the date it was added
  - Updated the sort order of list items like visits and conditions to be the most recent first
  - Resolved the issue of the patient portal not showing after search and authentication on the web interface
  - Corrected the labeling of the strength of medication from the quantity
  - Fixed a bug with patient portal images not showing

- Fixed a bug with user invitations not being received

- **My Account**
  - Added Registration Codes to grant users access to select features in the application
  - Updated the broken links in the support section to SMS and Email
