October 9, 2024 – Portal Search improvements

2024 · https://www.primaryrecord.com/docs/october-9-2024-portal-search-improvements/

Bugs or Issues

- Improved Patient Portal Search accuracy was improved. The results now favor the name of the provider or payer, then the location. Results without a clear keyword match are hidden.
- Browser tabs now show the page name. Some profile resource pages, like Medications, showed “Data” in the browser tab. This has been resolved for better usability.
